

TABLE XV.

TABLE XV. *The NUMBER of NOTES paid into the BANK in each Year, from 1841, with the AVERAGE NUMBER per Day.*

THIS Table shows the steady increase which has taken place in the consumption of Bank Notes from an average of 17,000 Notes *per diem* in 1841, to one of 51,000 in 1889.

This increase is, no doubt, largely due to the practice now very general among Bankers of avoiding the re-issue of Notes as much as possible.
